

## Nano Weaponry 4

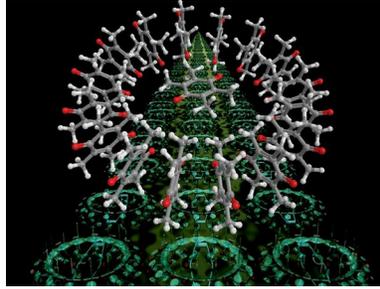

Nanofactory technology will begin with an assembler — a reprogrammable molecular machine capable of making a copy of itself. An assembler would be extremely small, composed of maybe a couple million atoms. --Molecular nanotechnology, sometimes called molecular manufacturing, describes engineered nanosystems (nanoscale machines) operating on the molecular scale. Molecular nanotechnology is especially associated with the molecular assembler, a machine that can produce a desired structure or device atom-by-atom using the principles of mechanosynthesis.

This is about the same as a ribosome. For a reference, see this picture of some nanoparts next to a virus

An assembler would basically be an artificial ribosome. Ribosomes are the little machines in the cell that manufacture every protein in your body. Its basic design hasn't changed in over a billion years

Special Note when the nanobiotech integrates with your ribosomes it initiates a new program for assembly and operations---til you disengage the program it will continue in it's objective so any thing that can directly assault this will just charge this and cause it to adapt and modify with a mechanism to defend and will improve upon its design~ the nano molecular machine works the exact same way as your cells do with a identical operating system designed to be adaptable

Molecular Nanotechnology

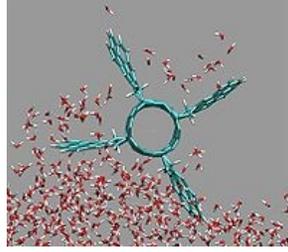

## Nano Molecular Machines ---Repercussions

**NANOTECHNOLOGY  
NEEDS LABELLING**

Nanoparticles are linked to:

- Asthma
- Bronchitis
- Emphysema
- Lung cancer
- Parkinson's
- Alzheimer's
- Crohn's
- Colon cancer
- Arteriosclerosis
- Blood clots
- Arrhythmia
- Heart disease
- Organ disease
- Neurodegenerative disease

Some of the health issues in regard to being exposed to this molecular take over-and this is not all of the health issues as **a result of advanced research and understanding you can attribute to health concerns ---all of them to exposure to this tech without exception**~ inducement through vaccinations~ medications~ supplements~ foods ~ water supply~ air~ pollutants from industry and manufacturing-even cosmetics~ toiletries~ cleaning agents~clothing~ in fact all your GMO and GE in foods uses this nano molecular biology to affect the crops and livestock fed these crops and then essentially to the general population---**there is no organics~ if you wanted to create a mutation a experiment to determine the results then this would be done easily by aerosoling the sky** to use people as test subjects to effect a change in there genetics~by inducing the nanomolecular components in a vaccine~ **you could program a disassociation with the dna and the immune system or you could disengage the mechanism for the immune system to respond to a invading assault on a host ( GCMAF is disengaged through vaccines)** or you could increase the efficacy of the delivery of the medicants with a **permanent disengaging of normal biological functions and manufacturing of chemistry**-benzodiazepine-comes to mind it accesses he receptor sites **and then shuts down the normal production of gaba**--the side effects as a result of causing the brain to imbalance are horrific~ enzyme activity~ ROS response~ Histamine response~ deactivate ATP production ~ disengage mitochondria~ reprogram the digestive system ~ cellular mutations (cancer) brain malfunctioning( alzheimers due to heavy metal over load and the brain producing the protein that would block the flow to the brain or the parkinsons where by the nanomolecules are embedded in the brain causing a network across the brain causing the brain to short out as a result you see the shaking and stuttering effects)

to further the details on how this can and does assault everyone\

**Conceivable types of nano-weapons are limited only by human imagination and include a variety of agents that may be designed to kill or maim human beings, animals, crops, or attack any of the many environmental systems composing the earth's fragile ecosystem.** A small sample of the types of potential nanotechnology-based weapons includes the following.<sup>14</sup> **Nano-poisons could be delivered to individual, small group or large group targets, not only to kill or disable, but could also be used to trigger specific brain functions or neural patterns thus effecting a form of mind control** for example, **by reducing aggressive impulses or rendering victims pliable and subservient. "Nano mind erasers" could modify or even erase a person's memory by inducing a succession of tiny and unnoticeable "micro fields" targeted to certain brain areas creating Alzheimer-like symptoms in its victims.** **Nano heart stoppers and stroke inducers would operate by restricting neural or arterial blood flow causing excruciating pain, permanent damage or death to its victims.** **Invisible nano needles could be projected at victims like bullets from guns at extended distances to arrest victims' physical movement or otherwise disable them.** In addition to serving as weapons of mass destruction and for targeted assassination, **nano devices can operate as "nano-dust spies" for reconnaissance purposes or sentinels in defensive applications.** **Respiratory, ingestive or dermal exposure to seeming innocuous nano-particles may pose a health hazard depending on the size, surface composition and bioreactivity of the particles and can cause adverse cellular and neural effects.**

so as you can see we have been duped and continually being duped by the medical field and with there incompetence with there Diagnostics~ nothing is as it seems and nothing is here to assist us in our endeavors to seek a long and prosperous life ~ the introduction of this molecular machine with the right operating system can make it the most dangerous assault weapon on the planet ~ don't be deceived into thinking that this is not all bad~ historically when ever anything was made for the "benefit of mankind" it always 100% of the time was a bane and caused untold damage to people who used these" benefits" but none of these are recorded~ and with the latest from the cdc saying they want to kill " white people" because they do not want to partake of there molecular technology that can cause irreparable damage the the dna -genetics -chromosomes and cause genetic transfer of that damage for up to 7 generations they feel this "benefit " that the european decent or european immigrants should be punished by execution~ what a benefit!! take it and your screwed dont take it and your dead--

**What can you do???**

everyone has this enology in you dont worry the globalist were equal opportunist when it came to sharing death ~ are you feeling privileged yet?" and so with all technology on any level the only thing missing once a system is built or loaded is to activate~ and once it is activated then there are only 2 ways to turn it off either A shut it down or B wipe out the program that it is operating on~ and then proceed to remove the constructs

**but in the interim you need to prepare not only in the removal but also on the prevention a to minimize exposure or neutralize** --so in this section I will mention a few things I have utilized and have shared globally with people who have also used these methods with success to bring down the loads to a managable level---- **let me insert here that as far as I know there is no cure due to the fact we are constantly being reloaded with these molecular machines daily in just breatheing and eating** **But there is** ways and means to manage the loads reduce them down and have relief~ am still

working on a better solution~ the **Anti nano bucket** produces a EMP or degausing effect on the nano when you place your legs inside the bucket with the water and acid and salt mix( acetic acid or vinegar or you can use citric) **with out** the pulsing you will remove only biofilm ~ material used by your system to either break down or contain the assault~ **with the pulsing** you will see all kinds of nano constructs release from chips ~ fullerenes~ wire like looking tubes~ metals that are shiney~ black carbon and or barium titanate~ silver~ aluminum~ what appears to be a sulphur~ copper particulates ~ metal particulates~ mimetics-- with the pulsing you begin to remove the constructs -disengage the program and drain the body of the build up~ may even see vericose veins diminish~ may see bruising of veins recover ~ see lower back pain become lighter and lighter til you almost feel like normal~ kidney over load is lessened~ and you may even feel less movement inside the body ( crawlies) which are quantum dots

you Also have the option of the **Anti Nano Triangle** which you can place in the tub where this hits the whole body~ by adding 4 salts~ TSP~ Epsom Salt~ Borax~ and baking soda 1/4 cup of each you hit the whole body and as well the salts will also disengage radiation from the body which you are constantly exposed to on a daily bases you may feel even more allieviated as a result and may see even bigger volume of release and relief-

Building **Scrambler units** in your dwellings will minimize activation by distorting the signals entering where you work or live which can also increase ionization in the area where you place the machines--**Adding shielding on the walls** ~ a faraday cage like unit or painting the interior with either lead or copper and grounding the walls (**make sure you have a direct ground**) this will also redirect the activation and in fact utilizing these things may assist in your sleep patterns-- You can also make yourself a **portable EMP** device that you can EMP yourself several times a day to increase the disabling of the molecular machines ( nanobiotech assembly) and afterwards bathe with the triangle can go along way in the removal or use the anti nano bucket so with devices

you can build--- <https://www.bitchute.com/channel/gS5E0SSRIbLH/> this can go along way in the removal and disengagement of the program

Foods to consume **are basically high saturated fats** ( cream ~ eggs~ yogurt full fat kefir full fat butter -ghee-palm oils lard tallow lanolin for cellular repair and integrity and hormone balance)~ do not use any omega 3 especially canola ~ flax or fish oils these will increase the compromise of the cells and break down there cellular integrity~ do not consume veges above the ground stick to root base and mash them down this will form a fibre when mashed and consumed and followed by a beverage will help it he removal of build up in the colon~ Veggies you want to consume are high in **saponins** which will keep kidneys as well as blood flushed ~ **sulphur based like onions and garlic** ~ if you have thyroid issues **do not use** horseradish ~ radish or black radish or mustard these will cause more compromise of the thyroid) as well **any animal protein or full fat dairy utilize do not use pea soy or rice or hemp proteins** they will ether have **glyphosates phyto estrogens are incomplete and deplete the body of minerals essential to antioxidant and enzyme productions** **wer usage should only be distilled or RO water water was meant to hydrate cleanse and atactivate**~ the argument utilized is without merit of the dangers and depleting effects of the water there is no evidence to substantiate the claim that it strips from the body whatsoever ~ and you need the cleanest water available to assist in the cleansing of the system~ other waters with gimmicks are what they are gimmickery and if you are using minerals then the cleaner waters will assist in the utilization ~ less to clean

**Detox** is going to be important once you disengage you have to remove te debris that is still inside which if it is not removed then your immune system will be on full on trying to remove ~ the Use of Sodium Thiol Sulphate is one of the most effective I have seen in removing this in huge volumes ~ to date nothing I have seen comes close to the effect only draw back is it taste like \_)(\*&^% for moe details

<https://www.youtube.com/watch?v=9EKXbeLK36o>

**Anything you can do to shield your self** ~ buying the copper or silver sheets to deflect the freq ~ can assist utilize the magnetic helmets as far as the feedback I have received were ineffective alot of pendants are being marketed and they to I have found and discussed with people in the field shows ineffectiveness~ due your due diligence in your research substantiate everything ~ dont just go by feelings~ most times they are unreliable ~ if you have a feeling or intuition if you act on it make sure you can verify it alot of times you may feel something and it turns out to be incorrect--biblically it states "there is no discharge from war" **we are at war with a AI world releasing nanoweaponary** on the GP daily~ do not allow media mainstream to weave and decieve and do not allow anything from new age to interfere either to date I have not seen anything yet that is accurate~ do not allow superstitious concepts to get in the way either~ usually this is ignorance with fear to insure you do not investigate and substantiate~ biblically it states **test all things and hold hast to what is Good** would suggest you apply this principal~ remember as well **opinions are like assholes everyone has one** but not everyone can prove what they say or what they present the concept here was to show you where we really are in the realm of this war and how it is being waged and who it is being waged against~ hopefully you are now better armed to fight the good fight and save your selves and the people in your network
