

Coronavirus Covid-19

Fact Not Fear

GOVERNMENT KILLER

*** CRITICAL YOU SEE AND UNDERSTAND***

**The chart that proves
the crisis was over before lockdown**

Coronavirus Covid-19

Fact Not Fear

This will be a very short video.
We will be publishing our 4th April data
Chart Update shortly.

However this one slide is new.
And it will take down the US and UK
governments if it is properly understood.

Coronavirus Covid-19

Fact Not Fear

Based on the Imperial College Covid-19 Response Team's work, later published on the 16th March, the UK Prime Minister went on television and he and the UK Chief Medical Officer announced that 80% of the UK could become infected and 1% (cited in the media as 530,000 Britons) could die.

Coronavirus Covid-19

Fact Not Fear

On the 16th March, when the formal report was published, the figures cited were 81% infected and 510,000 UK deaths and 2.2 million American deaths in an 'unmitigated' (free) society.

Coronavirus Covid-19

Fact Not Fear

We have already extensively demonstrated with our calculations and charts that such claims were plucked out of thin air, exaggerating the real risk 150 times.

Coronavirus Covid-19

Fact Not Fear

However some people seem to find it difficult (not our viewers, fortunately) to recognise where the chart is pointing.

So I finally did a different chart, based on the growth rate of the virus.

Coronavirus Covid-19

Fact Not Fear

Viewers familiar with our work will know that the virus does not (as claimed in social media) spread exponentially.

The ICCRT response team knows that also.

The chart on page 7 of their report shows a classic normal-like distribution.

It accelerates, then decelerates, then goes over the top, before rapidly descending once more to oblivion.

Coronavirus Covid-19

Fact Not Fear

It resembles a ball thrown into the air.
It goes up, but is immediately decelerating.

It is curling over.

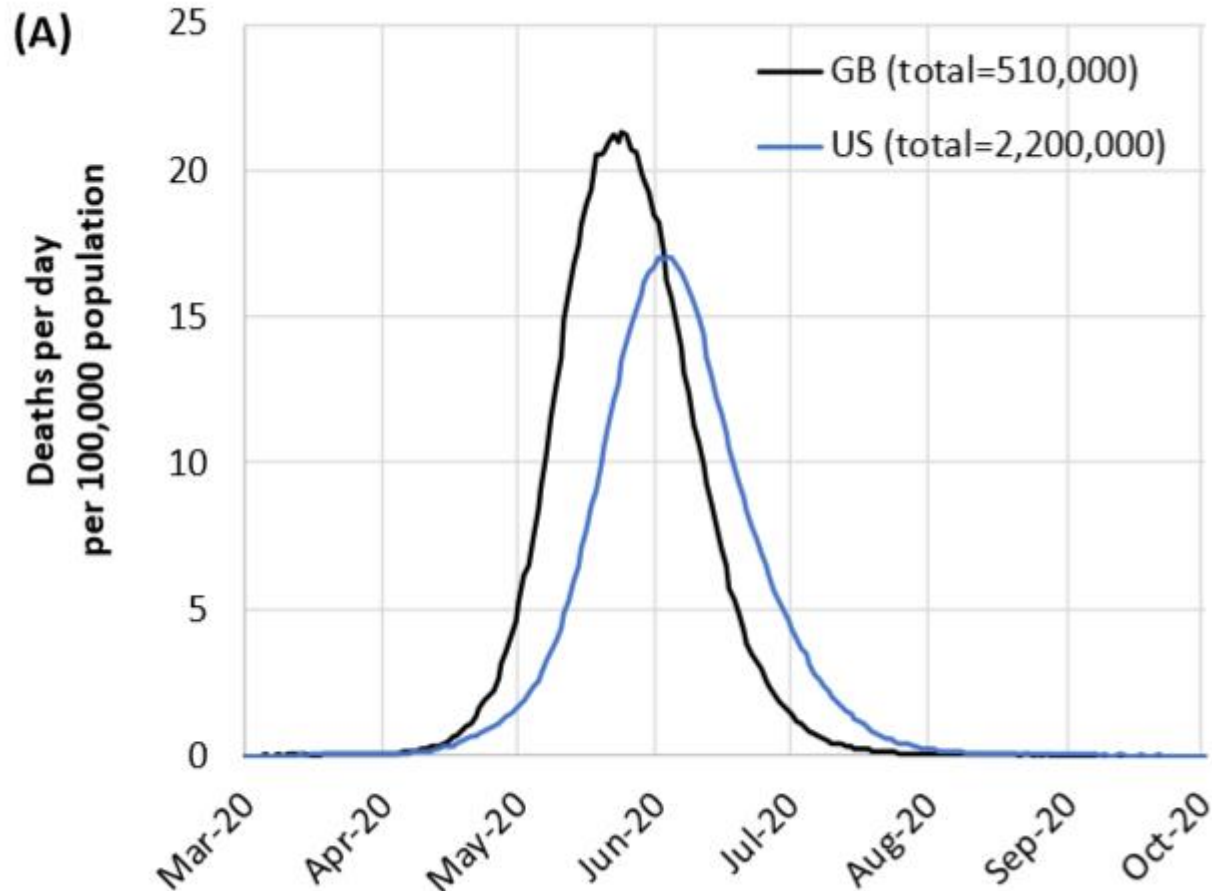

It is obvious, as soon as we see a ball curving
that it is not going into orbit.

You don't have to wait for it to start falling to know
that that is precisely what is going to happen.

Coronavirus Covid-19

Fact Not Fear

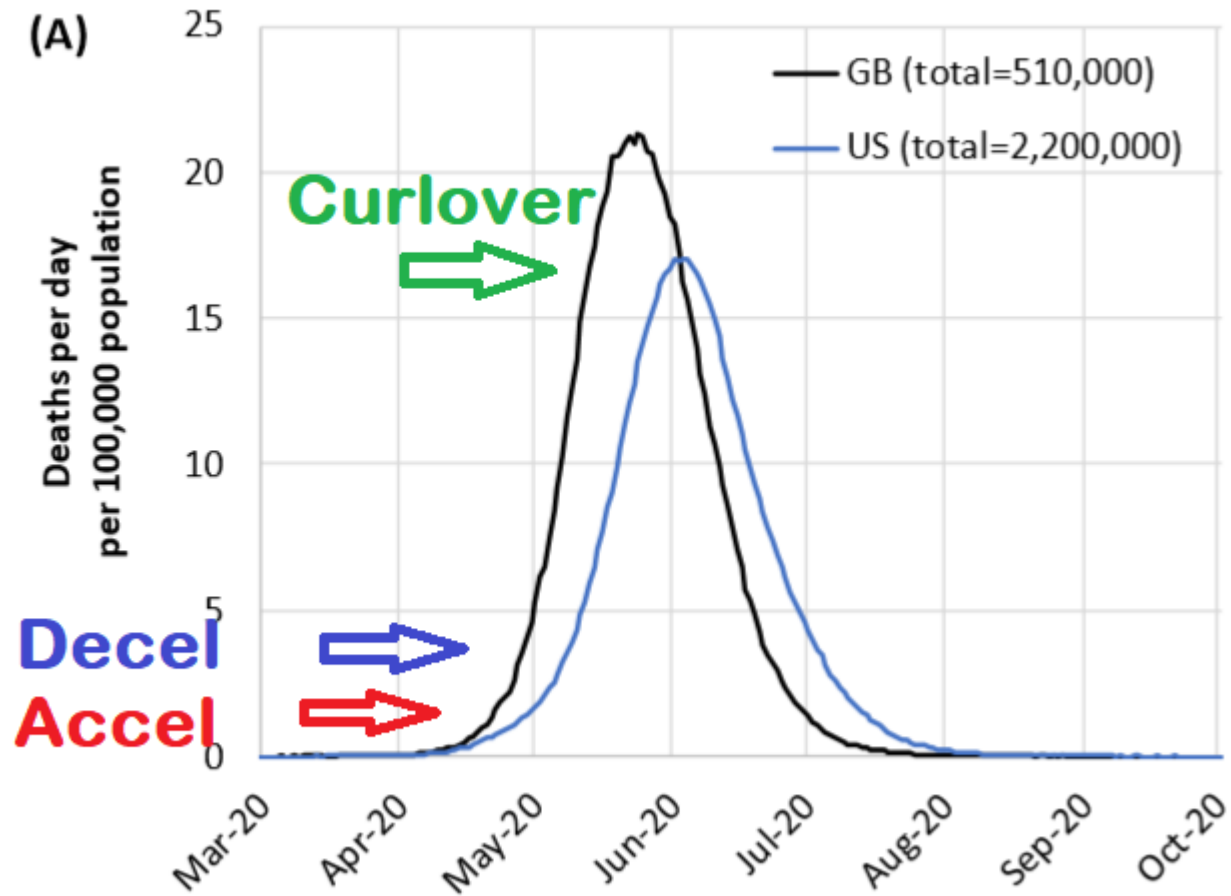

Likewise here.
This is the infamous ICCRT chart which claimed that 510,000 Britons and 2.2m Americans would die in an 'unmitigated' ie: free society.

Coronavirus Covid-19

Fact Not Fear

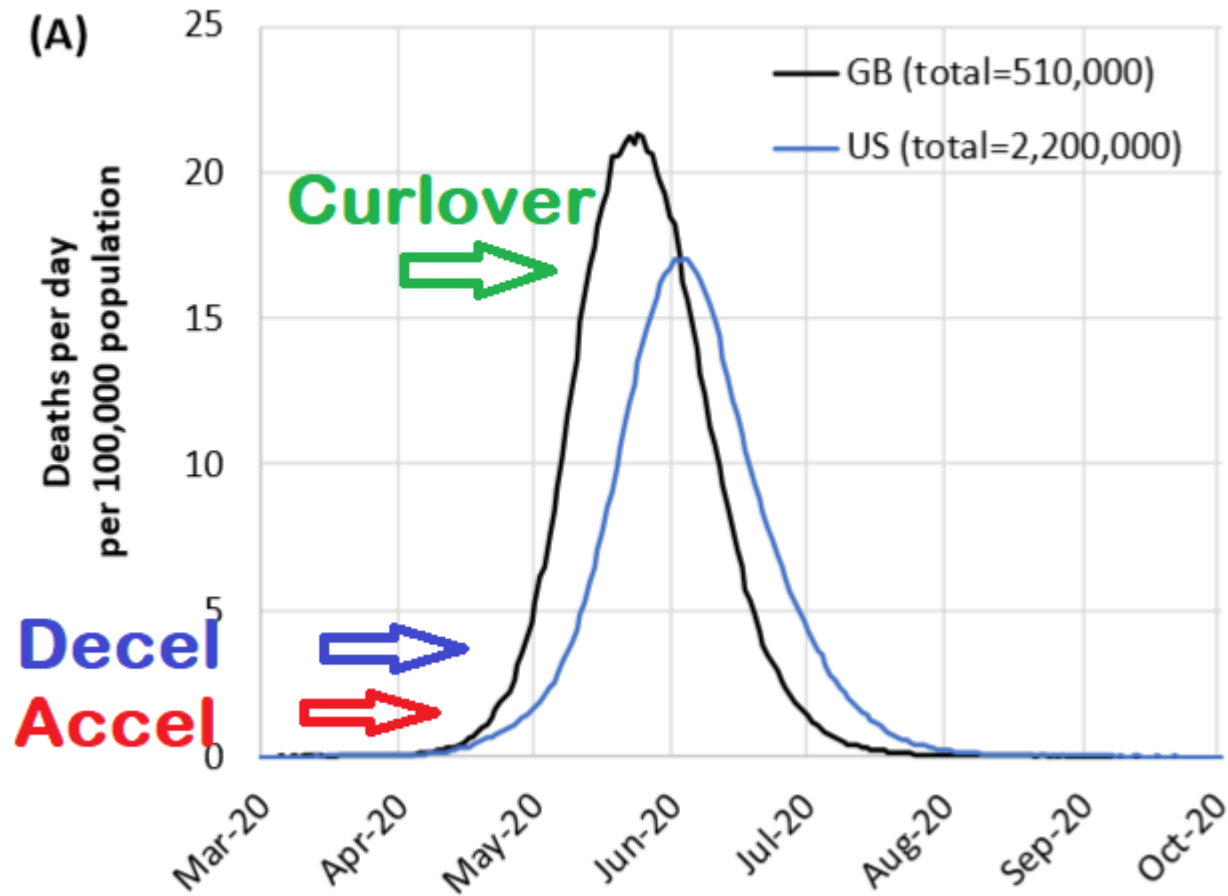

Here we highlight the critical phases of this normal-like curve: acceleration, deceleration and curlover

Coronavirus Covid-19

Fact Not Fear

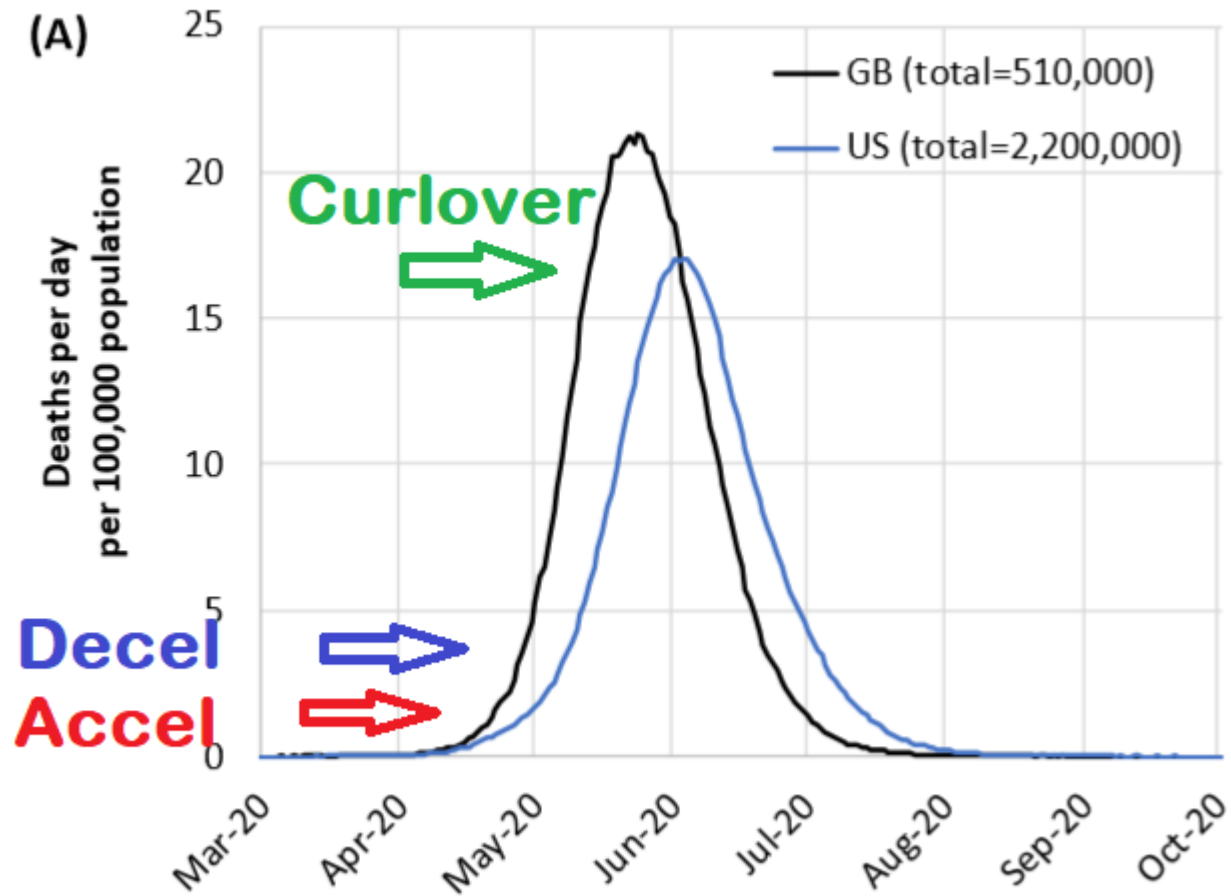

For the pilots or air-minded among you, this resembles Chuck Yeager's attempt to beat the world height record in an F104. The fighter's initial take off and climb, the rocket assisted lunge to height, and the fade and curl over the top.

Coronavirus Covid-19

Fact Not Fear

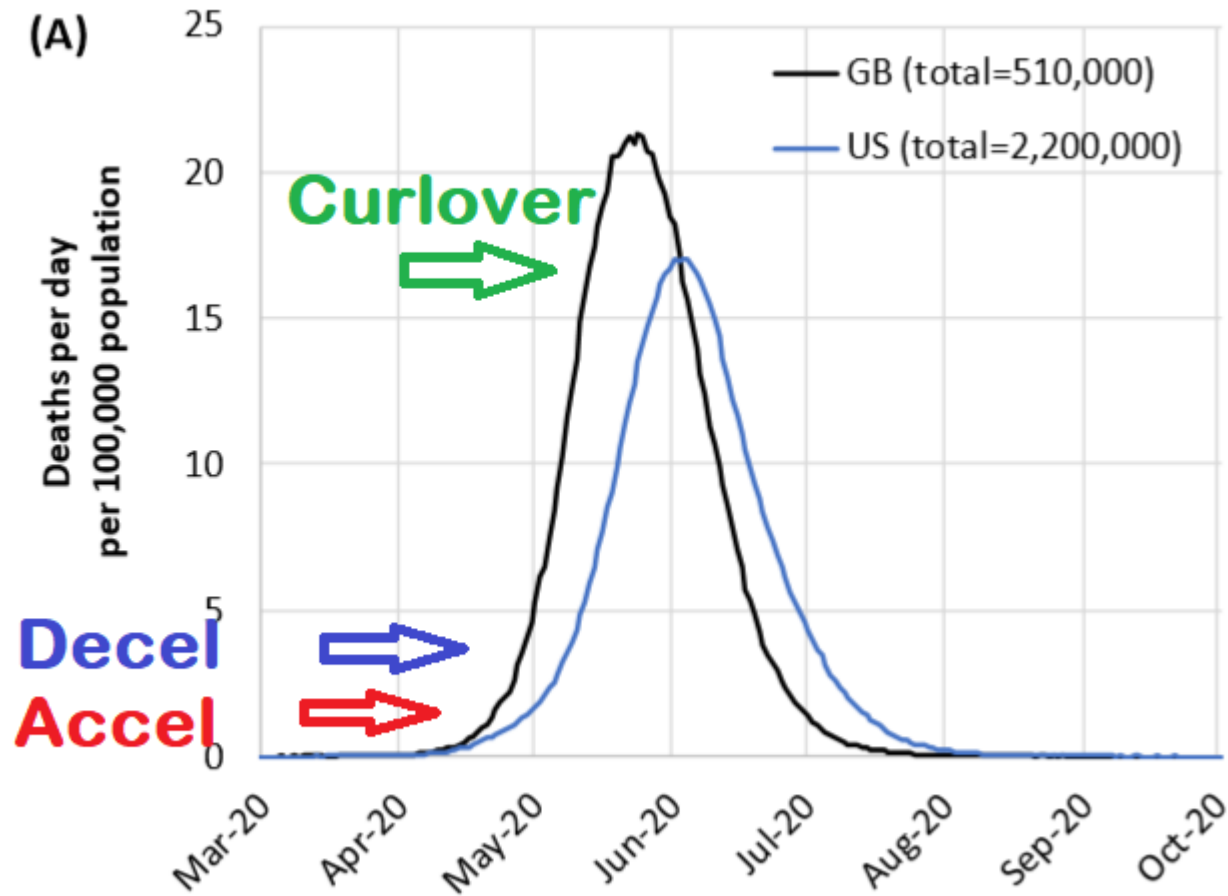

That didn't end so well for him, but he was alive at least. The point is you don't have to be a rocket scientist to visualise this sort of trajectory.

Coronavirus Covid-19

Fact Not Fear

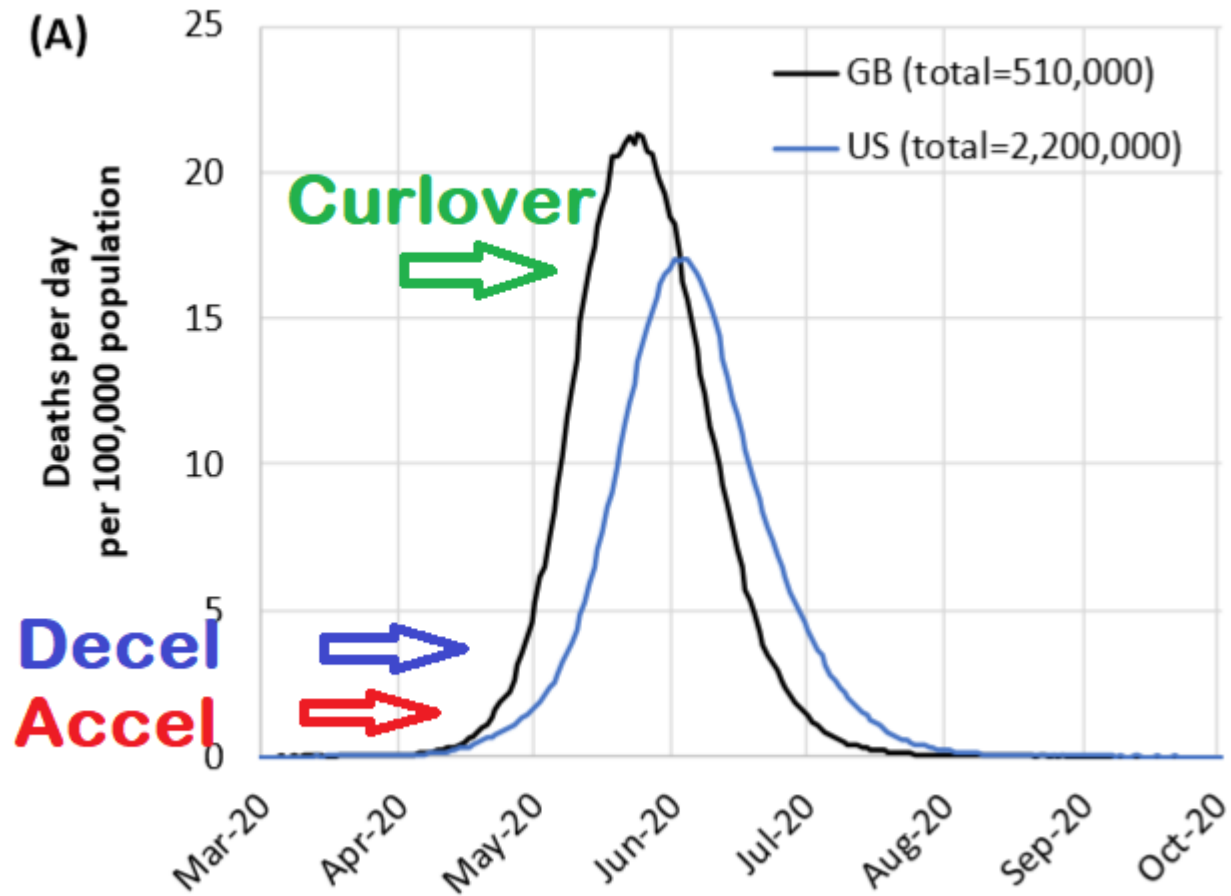

As soon as a ball is thrown into the air, you can see it decelerating and know it's not going into orbit.

Coronavirus Covid-19

Fact Not Fear

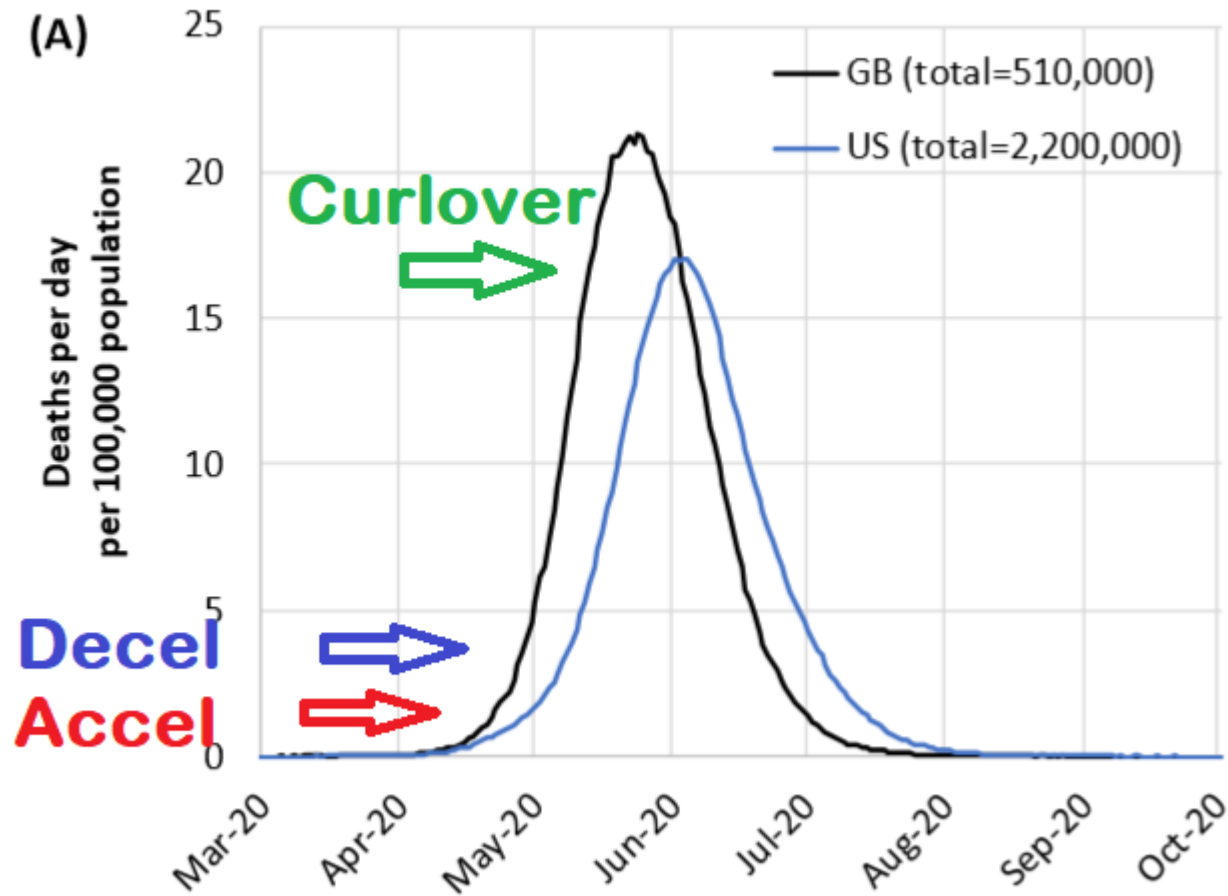

As soon as you see the virus decelerating, you know it's not going into orbit. The crisis is over, though the contagion will continue until exhausted.

Coronavirus Covid-19

Fact Not Fear

The much vaunted ‘peak’ is a distraction for the public.

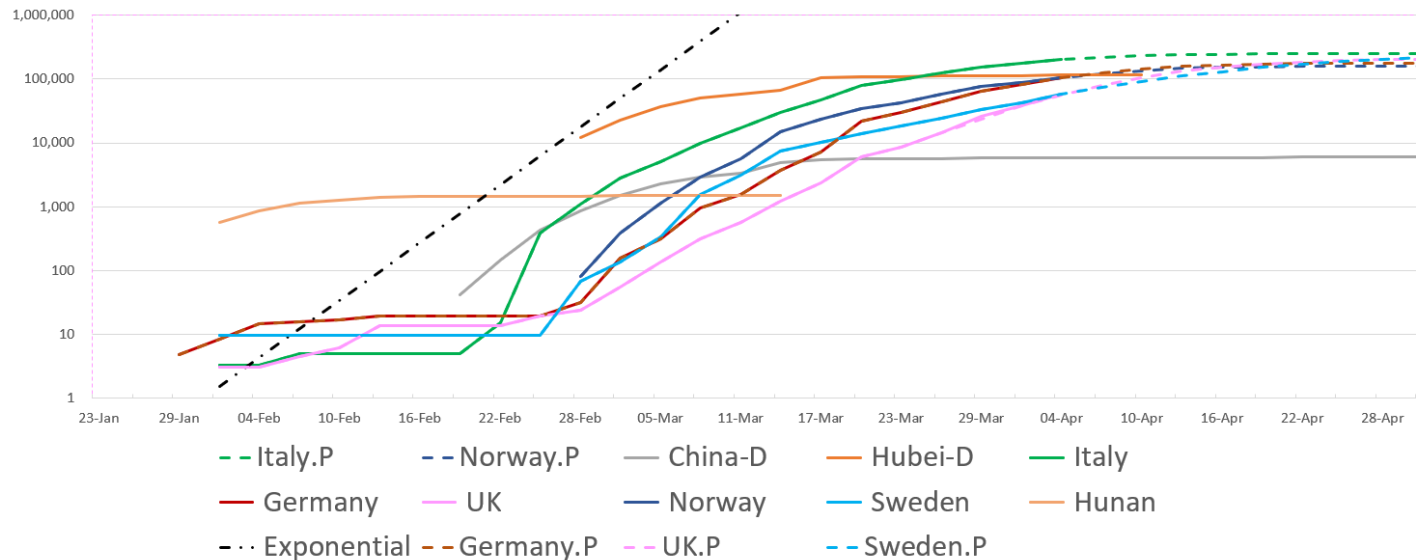

It’s why we “can’t be sure” and “have to keep the lockdown measures in place”.

Coronavirus Covid-19

Fact Not Fear

Cases Per 100m Population to 4th Apr 2020 - Updates Every 3 days
Peerless Reads YouTube - Erroneous 'exponential' line included
Projections from last data except UK from 26th March Lockdown

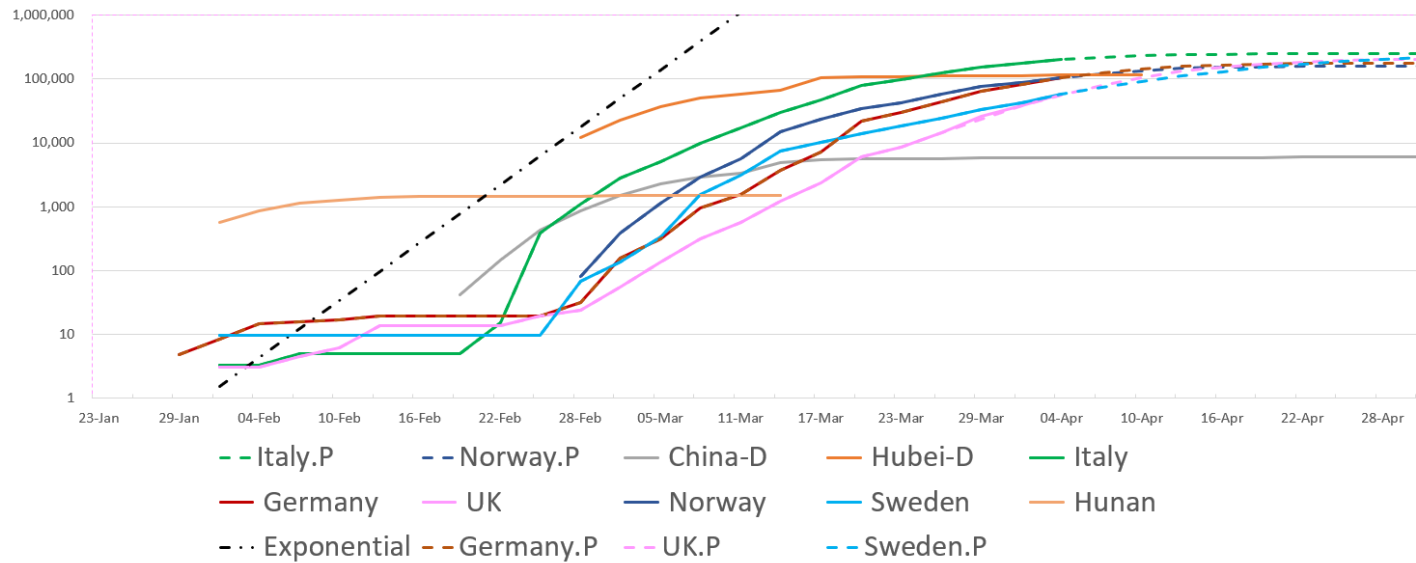

Really?
We've highlighted the curlover in our charts, and it's abundantly clear once that happens that the numbers are never going to remotely approach the threat.

Coronavirus Covid-19

Fact Not Fear

Cases Per 100m Population to 4th Apr 2020 - Updates Every 3 days
Peerless Reads YouTube - Erroneous 'exponential' line included
Projections from last data except UK from 26th March Lockdown

The government claims
it's lockdown that's
saving us.

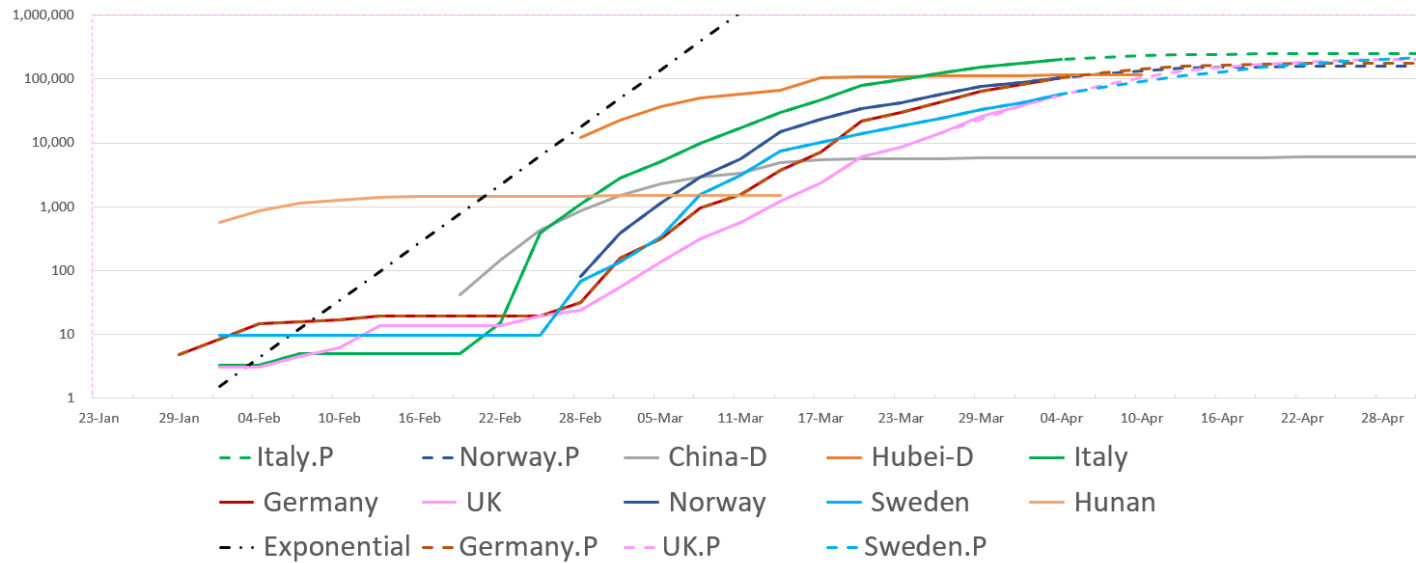

No, these curves were
well-defined long before
lockdown and unaltered
at this point by
lockdown.

Coronavirus Covid-19

Fact Not Fear

Cases Per 100m Population to 4th Apr 2020 - Updates Every 3 days
Peerless Reads YouTube - Erroneous 'exponential' line included
Projections from last data except UK from 26th March Lockdown

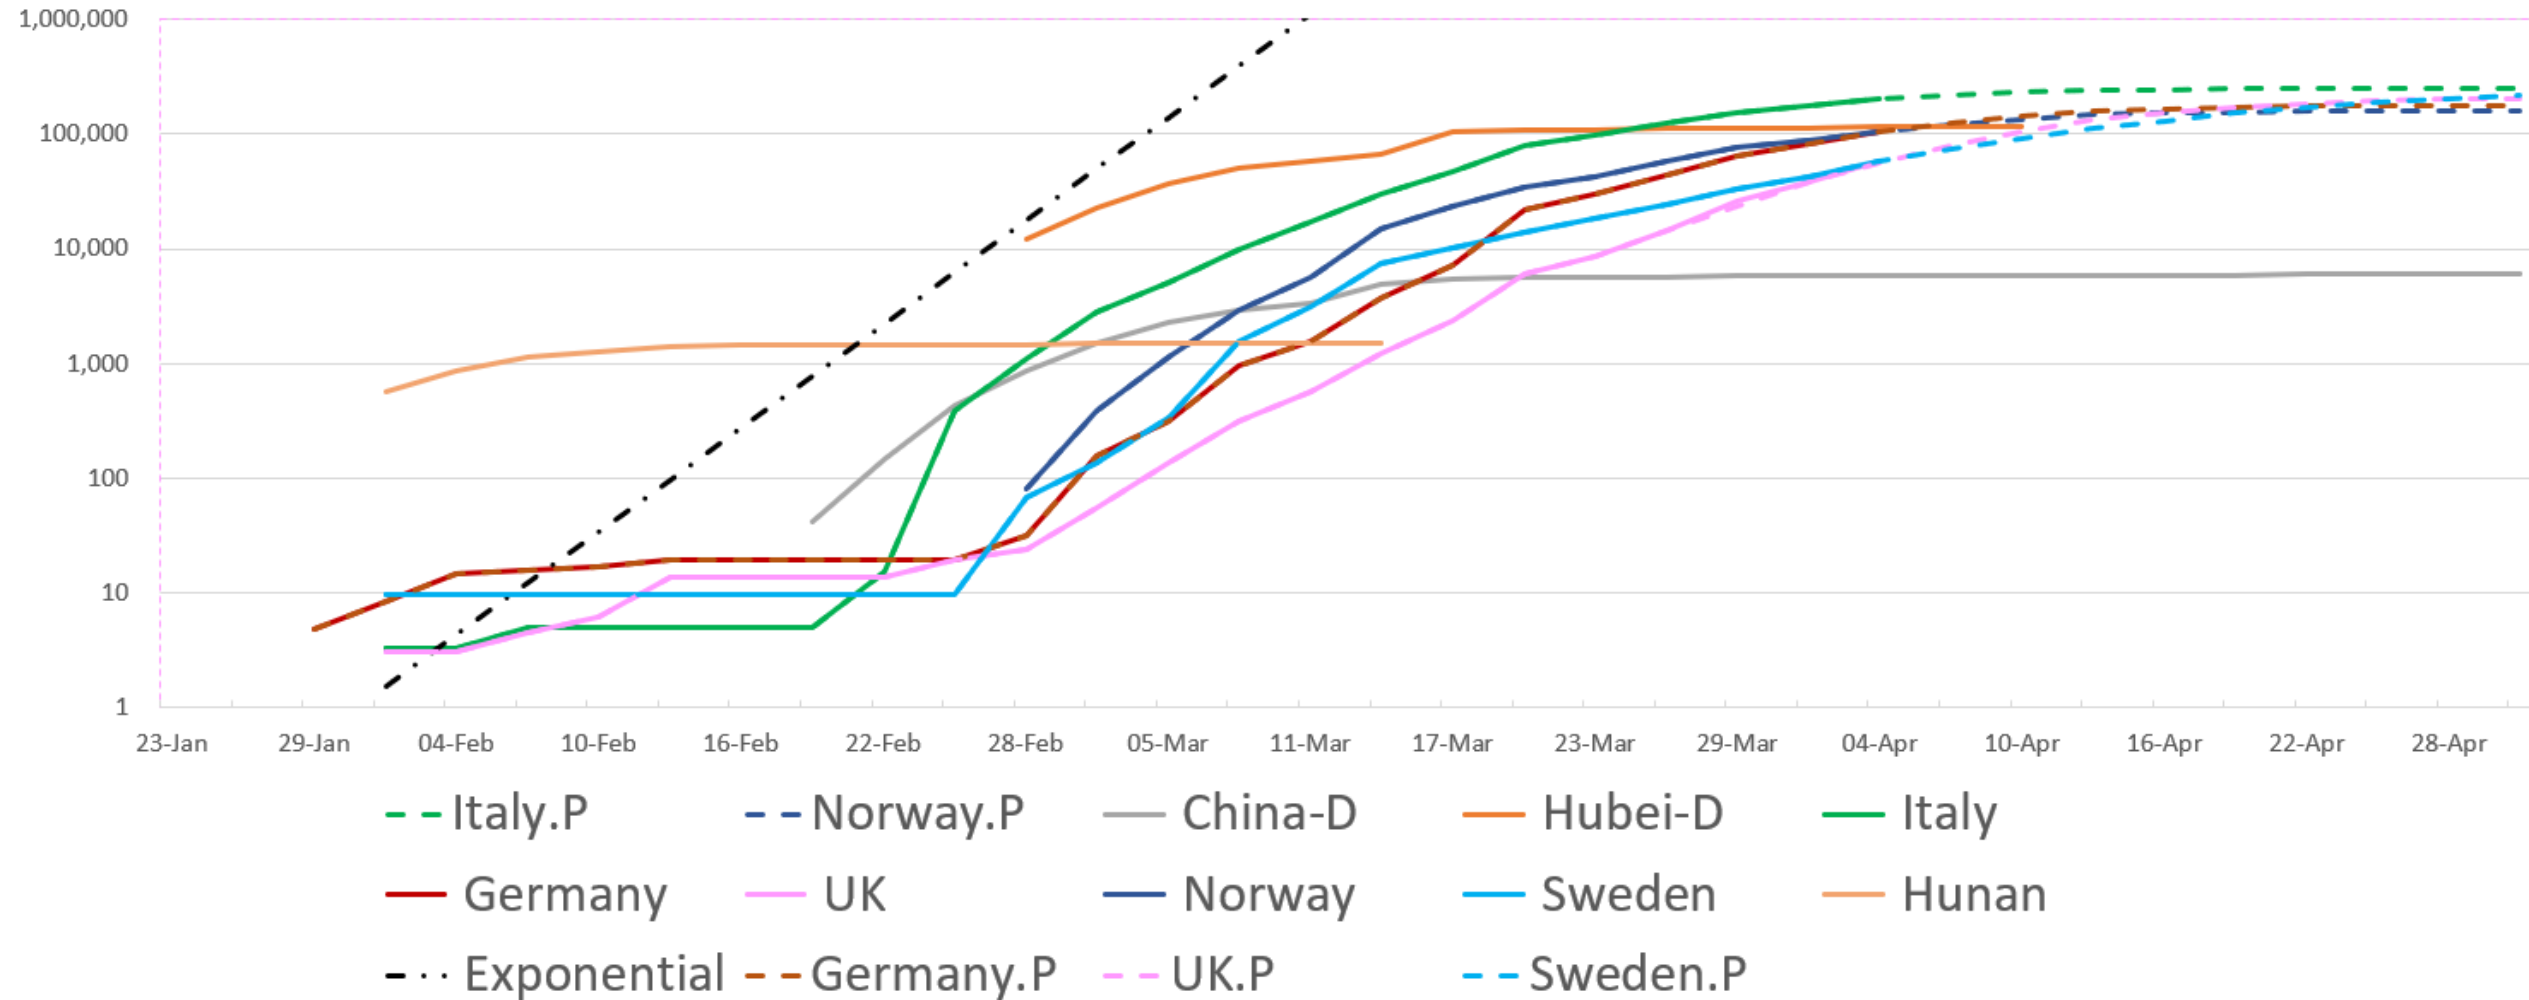

Save this chart.
I'll put it full-screen
for a few moments.
It's one of two
that gives YOU not
me the power to bring
down the governments
of the US and UK

Cases Per 100m Population to 4th Apr 2020 - Updates Every 3 days

Peerless Reads YouTube - Erroneous 'exponential' line included

Projections from last data except UK from 26th March Lockdown

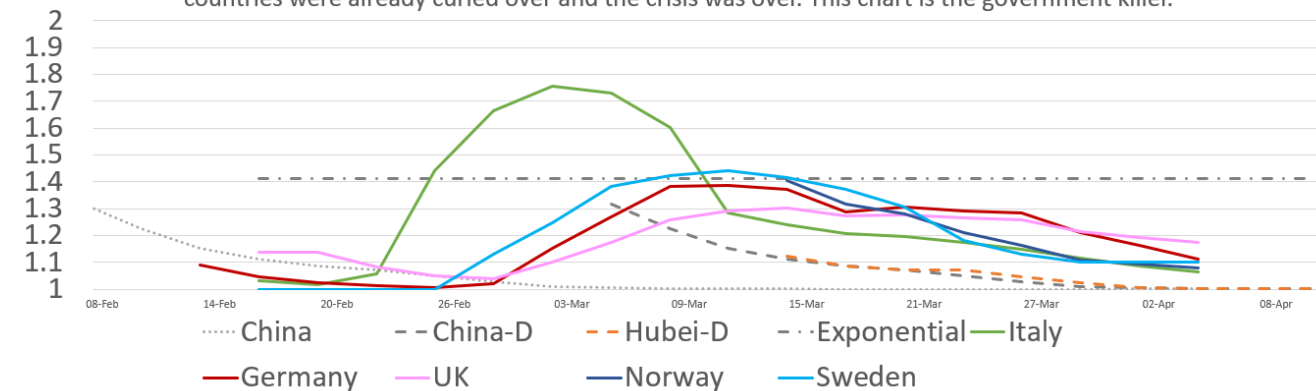

Coronavirus Covid-19

Fact Not Fear

9 Day 3 Data Point Trailing Average Daily Case Growth Factor
 (NOT percent ie: 20% growth = 1.2 factor or 120% factor)
 At 1.0 or 100% yesterday's total cases was the same as today's
 Unless cases are 'removed' (reclassified) the case growth factor cannot go below 1
 A peak here is not PEAK CASES. It is PEAK Case Growth.
 This is the indicator of CURLOVER that we have been describing
 Once the line here starts declining, case growth rate is diminishing
 The crisis is over. The contagion will continue to completion
 Italy curled over on the 3rd March, the day of UK Gov 530,000 deaths,
 Sweden, Germany on the 12th prior to publication of 510,000 deaths
 We curled over on the 15th March. By 23rd March, when lockdown was announced, these four
 countries were already curled over and the crisis was over. This chart is the government killer.

This is the growth rate of each countries cases. When the rate declines to 1, there is no further growth.
 Today's cases = 1 x yesterday's cases.

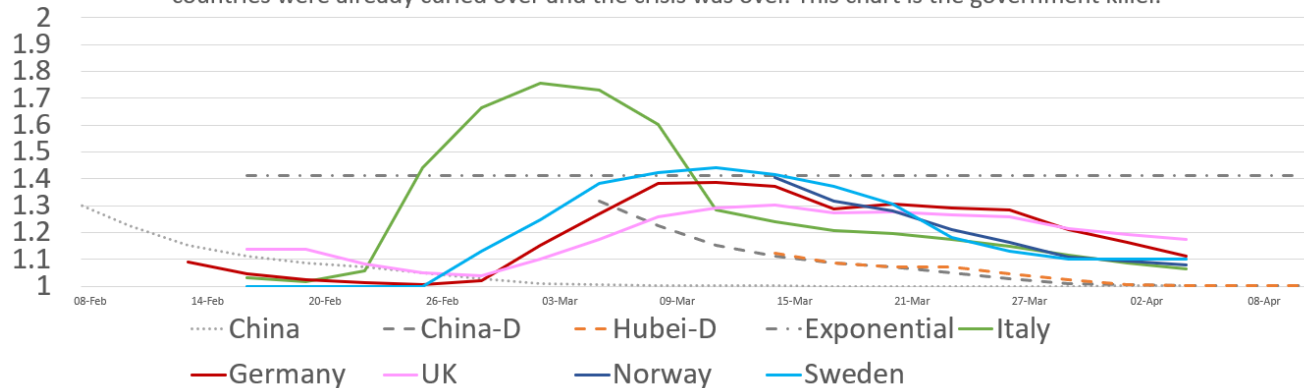

Coronavirus Covid-19

Fact Not Fear

9 Day 3 Data Point Trailing Average Daily Case Growth Factor
 (NOT percent ie: 20% growth = 1.2 factor or 120% factor)
 At 1.0 or 100% yesterday's total cases was the same as today's
 Unless cases are 'removed' (reclassified) the case growth factor cannot go below 1
 A peak here is not PEAK CASES. It is PEAK Case Growth.
 This is the indicator of CURLOVER that we have been describing
 Once the line here starts declining, case growth rate is diminishing
 The crisis is over. The contagion will continue to completion
 Italy curled over on the 3rd March, the day of UK Gov 530,000 deaths,
 Sweden, Germany on the 12th prior to publication of 510,000 deaths
 We curled over on the 15th March. By 23rd March, when lockdown was announced, these four
 countries were already curled over and the crisis was over. This chart is the government killer.

Look at that massively pronounced Italy curve. The height of the curve = growth rate (factor). The angle of the curve is acceleration (climbing) and deceleration (descending)

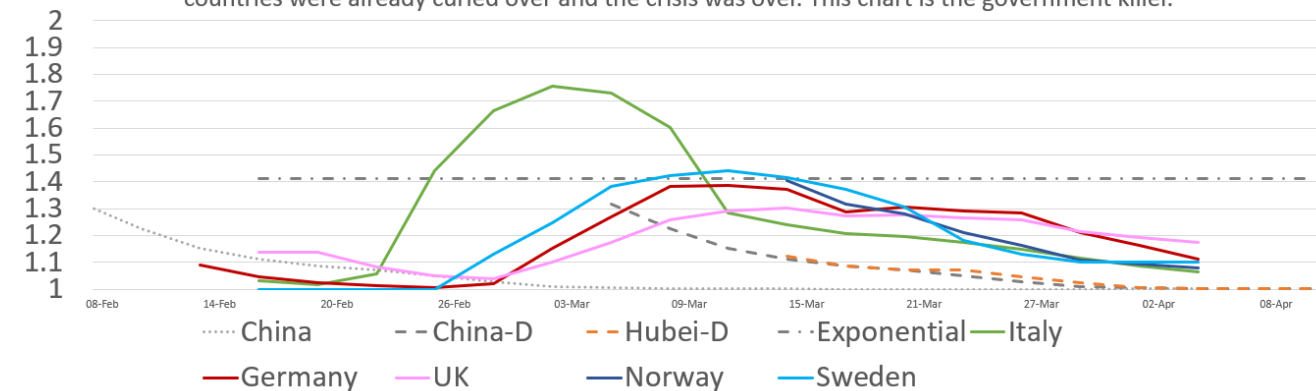

Coronavirus Covid-19

Fact Not Fear

9 Day 3 Data Point Trailing Average Daily Case Growth Factor
 (NOT percent ie: 20% growth = 1.2 factor or 120% factor)
 At 1.0 or 100% yesterday's total cases was the same as today's
 Unless cases are 'removed' (reclassified) the case growth factor cannot go below 1
 A peak here is not PEAK CASES. It is PEAK Case Growth.
 This is the indicator of CURLOVER that we have been describing
 Once the line here starts declining, case growth rate is diminishing
 The crisis is over. The contagion will continue to completion
 Italy curled over on the 3rd March, the day of UK Gov 530,000 deaths,
 Sweden, Germany on the 12th prior to publication of 510,000 deaths
 We curled over on the 15th March. By 23rd March, when lockdown was announced, these four
 countries were already curled over and the crisis was over. This chart is the government killer.

The previous hump chart was cases, and cases-per-day is 'speed' (distance over time). The horizontal dot-dash line is a constant acceleration at 1.4... each day 40% more cases are reported, the infamous and false 'exponential' meme

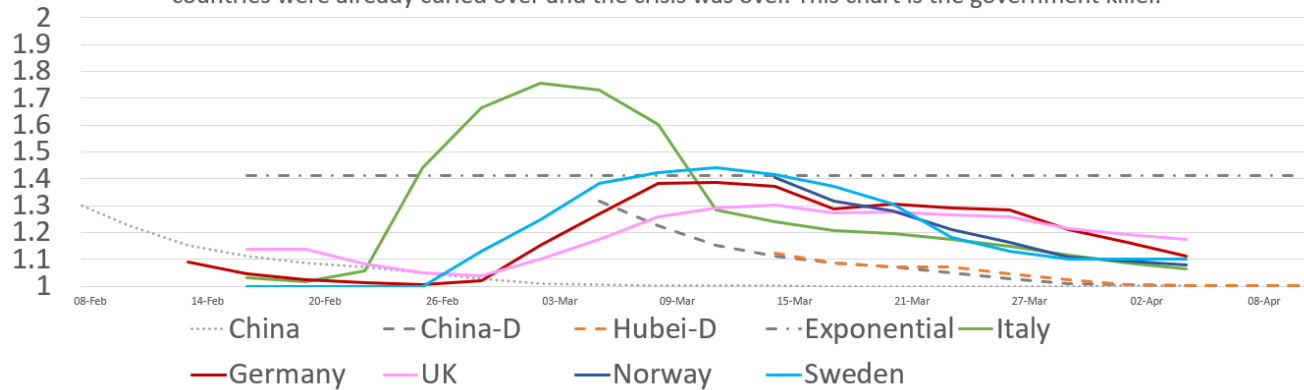

Coronavirus Covid-19

Fact Not Fear

9 Day 3 Data Point Trailing Average Daily Case Growth Factor
 (NOT percent ie: 20% growth = 1.2 factor or 120% factor)
 At 1.0 or 100% yesterday's total cases was the same as today's
 Unless cases are 'removed' (reclassified) the case growth factor cannot go below 1
 A peak here is not PEAK CASES. It is PEAK Case Growth.
 This is the indicator of CURLOVER that we have been describing
 Once the line here starts declining, case growth rate is diminishing
 The crisis is over. The contagion will continue to completion
 Italy curled over on the 3rd March, the day of UK Gov 530,000 deaths,
 Sweden, Germany on the 12th prior to publication of 510,000 deaths
 We curled over on the 15th March. By 23rd March, when lockdown was announced, these four
 countries were already curled over and the crisis was over. This chart is the government killer.

Italy (green) shows a hump,
 or changing acceleration.
 It is a second-order derivative.
 From 10% more cases today
 than yesterday, it climbs to eg:
 20% more cases tomorrow
 than today, 40% more cases
 the day after that.

Coronavirus Covid-19

Fact Not Fear

You don't need to understand the principles to recognise what the chart is saying and why it's important, but very briefly:

here's some examples:

1,2,3,4 => decelerating (+100%, +50%, + 33%)

1,2,4,8 => constant rate (x2, 'exponential')

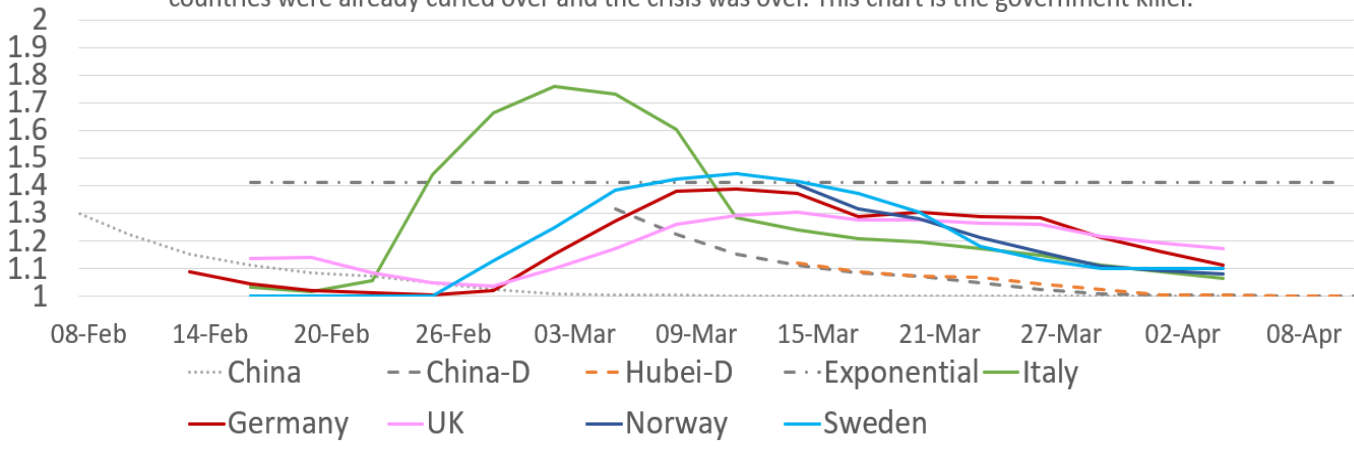

1,2,8,64 => accelerating (x2, x4, x8)

Coronavirus Covid-19

Fact Not Fear

9 Day 3 Data Point Trailing Average Daily Case Growth Factor
 (NOT percent ie: 20% growth = 1.2 factor or 120% factor)
 At 1.0 or 100% yesterday's total cases was the same as today's
 Unless cases are 'removed' (reclassified) the case growth factor cannot go below 1
 A peak here is not PEAK CASES. It is PEAK Case Growth.
 This is the indicator of CURLOVER that we have been describing
 Once the line here starts declining, case growth rate is diminishing
 The crisis is over. The contagion will continue to completion
 Italy curled over on the 3rd March, the day of UK Gov 530,000 deaths,
 Sweden, Germany on the 12th prior to publication of 510,000 deaths
 We curled over on the 15th March. By 23rd March, when lockdown was announced, these four
 countries were already curled over and the crisis was over. This chart is the government killer.

What matters though is WHEN
 It's obvious that Italy humps,
 and look at the date.

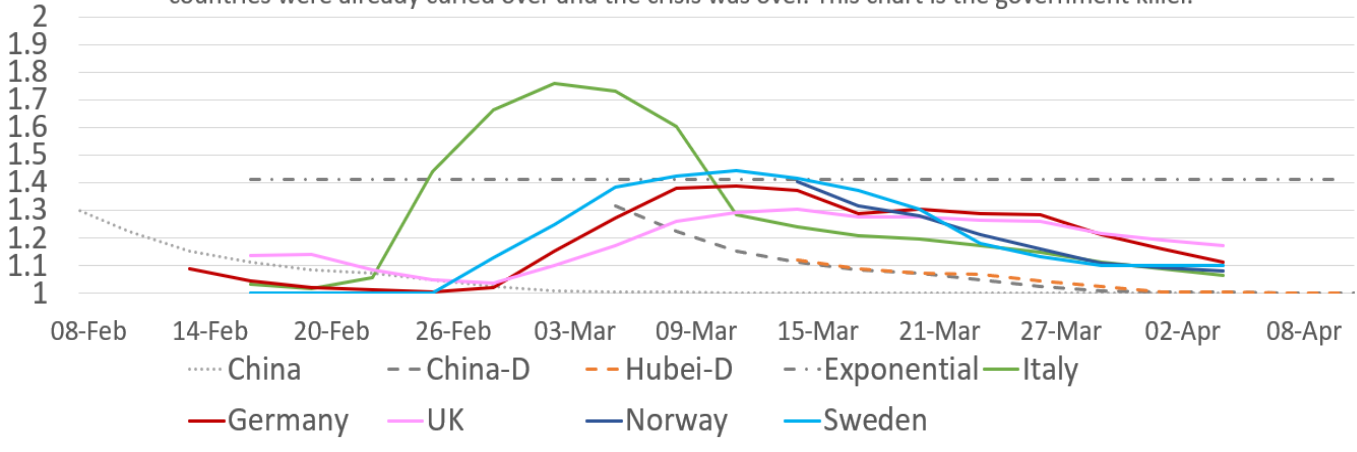

By 3rd March, the infamous
 530,000 deaths speech,
 Italy is already curling over,
 decelerating. This is the Case
 Growth Rate curlover,
 not the Case Rate.

Coronavirus Covid-19

Fact Not Fear

9 Day 3 Data Point Trailing Average Daily Case Growth Factor
 (NOT percent ie: 20% growth = 1.2 factor or 120% factor)
 At 1.0 or 100% yesterday's total cases was the same as today's
 Unless cases are 'removed' (reclassified) the case growth factor cannot go below 1
 A peak here is not PEAK CASES. It is PEAK Case Growth.
 This is the indicator of CURLOVER that we have been describing
 Once the line here starts declining, case growth rate is diminishing
 The crisis is over. The contagion will continue to completion
 Italy curled over on the 3rd March, the day of UK Gov 530,000 deaths,
 Sweden, Germany on the 12th prior to publication of 510,000 deaths
 We curled over on the 15th March. By 23rd March, when lockdown was announced, these four
 countries were already curled over and the crisis was over. This chart is the government killer.

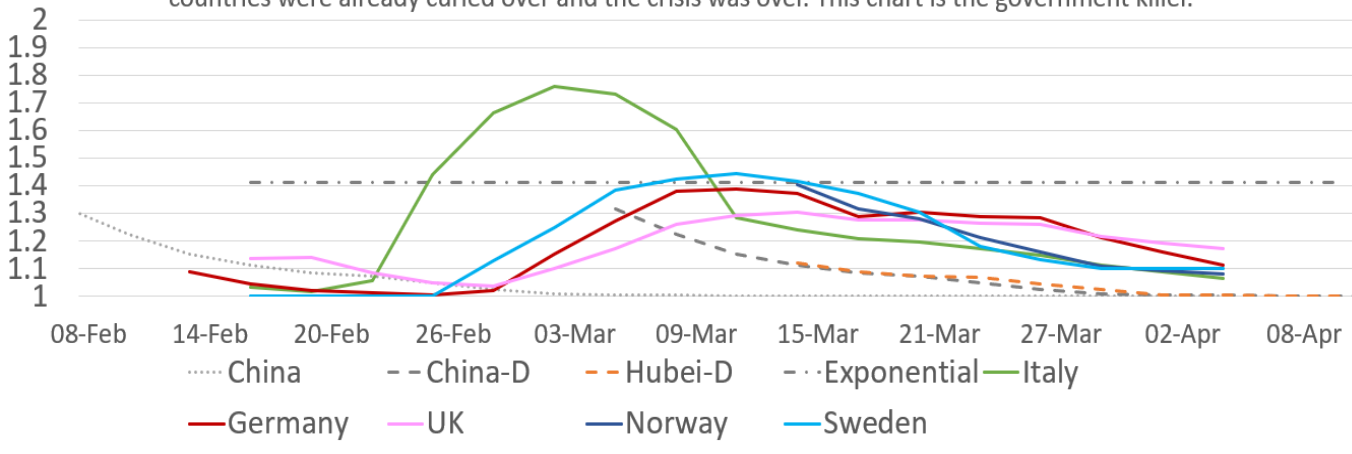

Even as the PM gave his speech, he and his advisors had access to this information. So either they are stupid or they chose to ignore this as well as all the other measures we've provided.

Coronavirus Covid-19

Fact Not Fear

9 Day 3 Data Point Trailing Average Daily Case Growth Factor
 (NOT percent ie: 20% growth = 1.2 factor or 120% factor)
 At 1.0 or 100% yesterday's total cases was the same as today's
 Unless cases are 'removed' (reclassified) the case growth factor cannot go below 1
 A peak here is not PEAK CASES. It is PEAK Case Growth.

 We curled over on the 15th March. By 23rd March, when lockdown was announced, these four
 countries were already curled over and the crisis was over. This chart is the government killer.

Yes, the contagion would grow, but at a reducing rate, and like a ball thrown into the air, its fall to earth was inevitable, and at figures far lower (as our charts illustrate) than the infamous estimates.

Coronavirus Covid-19

Fact Not Fear

9 Day 3 Data Point Trailing Average Daily Case Growth Factor
 (NOT percent ie: 20% growth = 1.2 factor or 120% factor)
 At 1.0 or 100% yesterday's total cases was the same as today's

Coronavirus Covid-19

Fact Not Fear

Cases Per 100m Population to 4th Apr 2020 - Updates Every 3 days
Peerless Reads YouTube - Erroneous 'exponential' line included
Projections from last data except UK from 26th March Lockdown

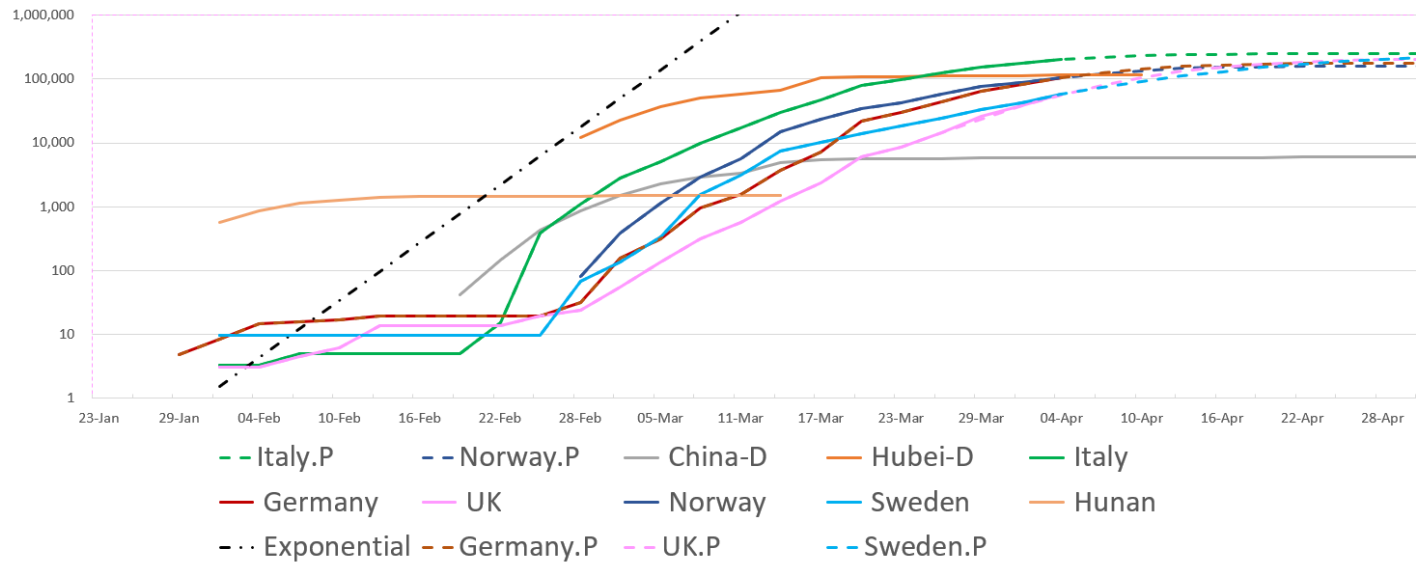

You've seen in our curves tracking the countries (now 42 of them by request) that like an arrow or dart thrown at a target, it's not hard to suggest where they're going to land.

Coronavirus Covid-19

Fact Not Fear

Cases Per 100m Population to 4th Apr 2020 - Updates Every 3 days
Peerless Reads YouTube - Erroneous 'exponential' line included
Projections from last data except UK from 26th March Lockdown

We might aim at a dartboard and be off by an inch or two, maybe six inches if we're not that skilled.

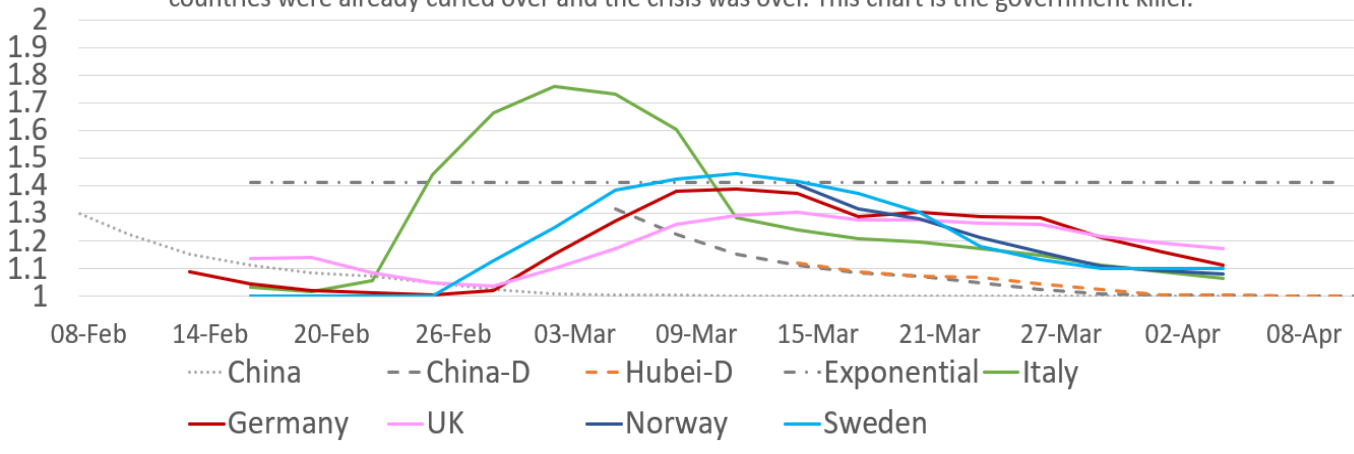

The government would have us believe you can miss by 75 feet.

Coronavirus Covid-19

Fact Not Fear

9 Day 3 Data Point Trailing Average Daily Case Growth Factor
 (NOT percent ie: 20% growth = 1.2 factor or 120% factor)
 At 1.0 or 100% yesterday's total cases was the same as today's
 Unless cases are 'removed' (reclassified) the case growth factor cannot go below 1
 A peak here is not PEAK CASES. It is PEAK Case Growth.
 This is the indicator of CURLOVER that we have been describing
 Once the line here starts declining, case growth rate is diminishing
 The crisis is over. The contagion will continue to completion
 Italy curled over on the 3rd March, the day of UK Gov 530,000 deaths,
 Sweden, Germany on the 12th prior to publication of 510,000 deaths
 We curled over on the 15th March. By 23rd March, when lockdown was announced, these four
 countries were already curled over and the crisis was over. This chart is the government killer.

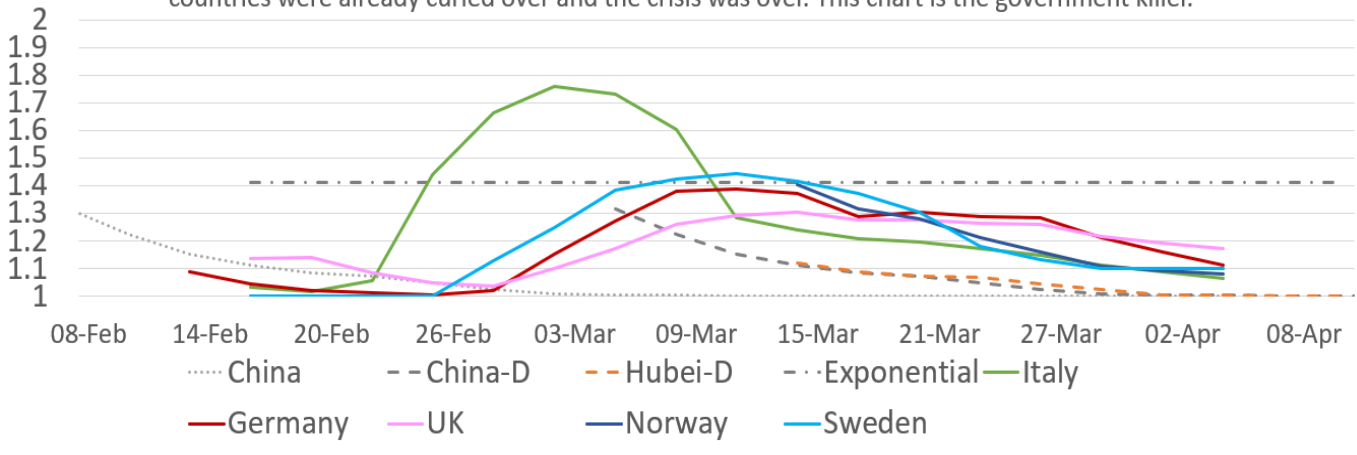

The game is up.
 Between arithmetic and
 simple comparisons
 (3000 over there,
 3000 over here)
 trajectories (the curves
 their levels and projected
 levels), and the timing shown
 here, it's all over.

Like the ball in the air,
 or the curves here, it's
 already over.
 The US and UK
 governments have already
 fallen. It's just not
 happened yet.

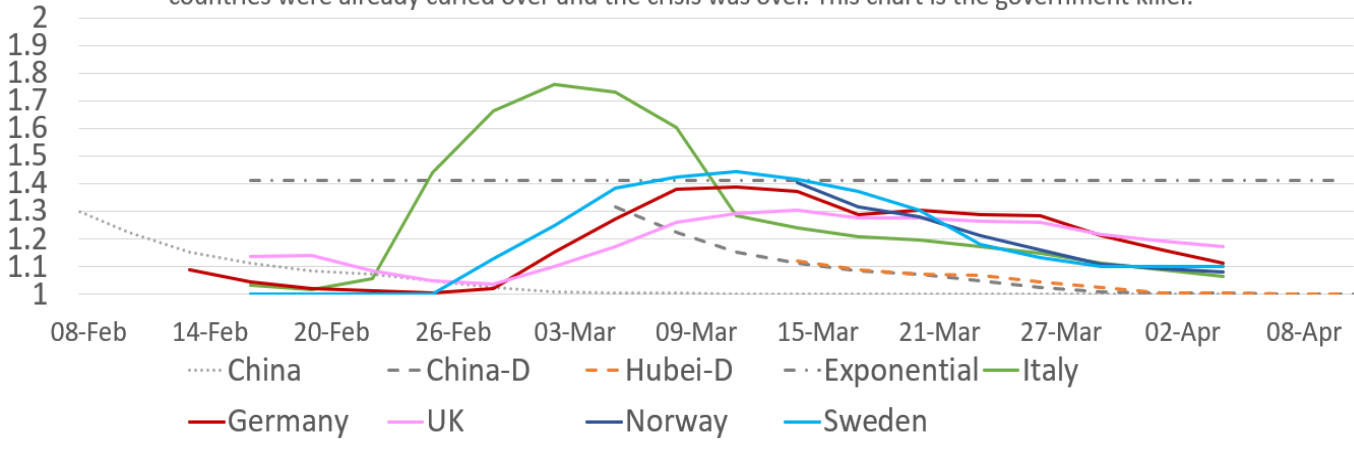

Coronavirus Covid-19

Fact Not Fear

They have – I was going to say a few minutes, but these charts are already out there. So no, even doing a Dr Kelly on me cannot stop this now.

And remember: it's not my accusation, it's their own data. If they attempt to discredit me or disappear me (and that is a common enough tale), then YOU become the secret holder. All of you.

Coronavirus Covid-19

Fact Not Fear

To protect two western governments, two of the most powerful in the world, and sadly then Canada's also, and every country that liaised with them and who received and studied the Imperial College report, and who implemented draconian lockdowns and loss of liberty on their people...
... to protect that, their control over a minimum of 420 million people (US, UK, Canada), do you think that would be worth a visit, a suicide, the destruction of a reputation?

Coronavirus Covid-19

Fact Not Fear

So from this point forward, remember: it's the DATA that condemns them, not me.

It's their ACTIONS that condemn them, not me.
It's their KNOWLEDGE even as they acted that condemns them, not me.

And it's their CHOICE to ignore REAL WORLD data and pluck a number out of thin air that condemns them.
Not me.

Coronavirus Covid-19

Fact Not Fear

You are now informed.

You are now a witness.

You are now an accuser,

if you understand what we've shared.

It's all there in WHO Daily Situation Reports.

It's all official government data.

Their own data condemns them.

Coronavirus Covid-19

Fact Not Fear

What you do with that, I leave to you.

Personally, I would say that anyone in a position of authority, anyone 'elected', anyone in uniform, has failed utterly and has revealed their willingness to coerce and control you in complete disregard to the very principles of freedom and democracy that they say we're supposed to live under.

Coronavirus Covid-19

Fact Not Fear

Do not tolerate a 'mistake' by the Imperial College,
'deeply regretted' by your leaders, and 'outrage' by your
Senators, Representatives, Governors,
and Members of Parliament.

Every one of them has lived off you.

Every one of them failed to do the most basic common sense
check before consenting to constrain and imprison you
in your own country without cause or charge.

Coronavirus Covid-19

Fact Not Fear

I do not believe that any mechanism of government should escape after this betrayal.

Store the PDF of this video quickly, because we have come to the point where the evidence is clear and against the very people who control our media and our nations. Only you can bring the governments down that have so treated you.

Coronavirus Covid-19

Fact Not Fear

I have given you the information.

It is their information.

I hope for a long and fruitful life.

I may not enjoy one.

And my reputation and my family may be destroyed.

But it doesn't matter.

As long as you have this safe.

And you do not let people forget.
